Desktop Call Manager Software Update Version: 1.0.0.9 Date: 1/28/10

1.0   Notes

- Note that we have had to change the URL for Click Once deployment. The old URL http://cmupdate.ipitomy.info/IPitomyPBXCom.application is still available, but due to an issue with Microsoft development tools, we are unable to update the application at this location. A new URL http://dcmupdate.ipitomy.com/IPitomyPBXCom.application is now available and will be the URL for new updates. If you have the old version installed and want to upgrade you need to uninstall the current Desktop Call Manager and install from the new URL.
- The Update from 1.0.0.6 to 1.0.0.9 is a minor change that effects installation on some machines so there is no necessity to upgrade current installs unless you want bug fixes that may follow 1.0.0.9.

2.0   Bugs Fixed

- Call Manager should no longer fail to install on Windows 7 clean installs. This was due to a change in default permissions for .NET Runtime.
